"Hiking" Shoes For Our Troops.
The Washington Times says that a "hiking" shoe has been adopted by the war department for the use of the troops in the Philippines. Experience has shown that the ordinary service shoe is not adapted to the hard service to which it is subjected in the rough sections of the country, especially during the wet season. The new shoe is what is commonly known as the hunting shoe. The sole is heavy, and the heel and sole are fitted with hobnails, an idea adopted from the English army shoe. The uppers come well up on the leg, and the tongue is arranged so as to exclude water. The shoe is made of rough grain leather of the so called tan variety and, while lighter in weight than the English army shoe, is believed to be equally durable.

War Ship to Be Used as Target.
One of the most daring experiments in naval annals in times of peace will be carried out at Brest within the next few months, says a Paris special cable to the New York Herald. This is nothing less than the firing of a shell against the turret of the new war ship Suffren, chosen as a target. The shell will be fired from a 305 millimeter (12 inch) gun of the Massena at 400 meters (1,312 feet). The shell, of course, is not explosive, the purpose of the experiment being merely to study the result of such an impact on the vessel struck.
